SUMMARY

Software Engineer II specializing in distributed systems, backend infrastructure, and full-stack development. Experienced with Go, Python, TypeScript, React, Kafka, Kubernetes, GraphQL, and PostgreSQL.

EXPERIENCE

GEICO

Palo Alto, CA

Software Engineer II

Feb 2026 – Current

- Reduced asset transfer and decommissioning workflows from weeks to days for 150+ teams managing 60K+ assets by architecting and leading development of an end-to-end asset certification platform using React/TypeScript, GraphQL, and PostgreSQL.
- Led 3 cross-team integrations with PaaS, Identity, and Problem Management teams to ingest and standardize asset data into the CMDB, enabling asset certification and automated policies.
- Processed 250K+ assets/hour across multiple infrastructure platforms by designing and building a Go-based Kafka consumer service deployed on Kubernetes with Knative, enabling near real-time synchronization of asset data in the CMDB.

Software Engineer I

July 2024 – Feb 2026

- Developed a configuration management database (CMDB), processing 100K+ assets/hour from cloud and internal platforms by building Python ETL pipelines, standardizing and storing asset data in PostgreSQL to support 11+ teams and meet compliance requirements.
- Improved asset ownership by building a Python Slack bot that generates weekly ownership reports across all asset sources, giving stakeholders visibility to drive 95% ownership coverage.
- Enabled 1,000+ users to discover and manage assets across 1M+ records from 16+ data sources by building a scalable React/TypeScript platform with GraphQL APIs and PostgreSQL queries supporting optimized search, filtering, ownership views, and pagination.

Chick-fil-A-Franchise

Roseville, CA

Guest Experience Team Member

March 2021 – July 2021

- Delivered high-quality customer service in a fast-paced environment, handling large order volumes and peak-hour rushes, earning recognition for outstanding order accuracy and speed.

PROJECTS

Reddit TTS

- Automated end-to-end video production and publishing with Python and GitHub Actions, ingesting Reddit posts, generating narrated videos, and publishing content to YouTube shorts daily without manual intervention.
- Integrated Google Text-to-Speech and OpenAI Whisper APIs to generate narration and subtitles programmatically, reducing video production time from hours to minutes.

Aloe Vera Wealthness

- Collaborated in an agile environment to develop a full-stack Swift health-tracking iOS app integrating Apple HealthKit and focusing on user metrics such as sleep, diet, and exercise.
- Designed and implemented Firestore user authentication and data models to securely manage user accounts and store health metrics in a cloud NoSQL database.
- Built an AI-powered nutrition recommendation service by integrating OpenAI and USDA FoodData Central APIs, processing user health metrics to generate personalized dietary insights and food search results.

TECHNICAL SKILLS

Programming Languages: Python, Go, TypeScript, Java, C/C++, SQL, JavaScript, Swift

Tools & Technologies: React, GraphQL, REST APIs, PostgreSQL, Kafka, Kubernetes, Docker, Azure, Grafana, Prometheus, ArgoCD, Git, Claude Code, Cursor

EDUCATION

University of California, Irvine

Irvine, CA

Bachelor of Science in Computer Science

Sept 2021 – June 2024

- Coursework: Data Structures and Algorithms, Object Oriented Programming, Machine Learning, Database Management, Operating Systems, Web Development
